Name	1.1 Client Views
Purpose	The User's view of the webpages
Description	How the user interacts with the webpages on the website. It starts with a login, then the login is verified by checking the password and email. After that the user is able to search for a professor, or major, or a class in an element that I called enter query. When the user enters there query it would respond with either professors, classes or majors. The user can then add and drop classes, check their class schedule, or add and change their major.
Requirements	HTML, CSS, Javascript, SQL
Elements	1.1.1 login
	1.1.2 validate login info
	1.1.3 enter query
	1.1.4 response to query 1.1.5 add or remove classes 1.1.6 add or change major 1.1.7 class schedule
